Uber Ride Analytics

Data-driven insights for revenue optimization and operational efficiency

Made with GAMMA

Project Overview

SQL Analysis

Query trip data for revenue trends and demand patterns

Power BI Dashboard

Visualize KPIs and operational insights

Business Goals

Improve revenue and service performance

Made with GAMMA

Key Performance Indicators

01

Total Bookings

Number of trips booked over time

02

Total Booking Value

Total revenue generated from all bookings

03

Average Booking Value

Average revenue per booking

04

Total Trip Distance

Combined distance covered by all trips

05

Average Trip Distance

Average travel distance per trip

06

Average Trip Time

Average duration of trips

Made with GAMMA

Donut Chart Visualizations

Dynamic Updates

Measure-based visualization changes with user selection

Segmentation

- By payment type (Card, Cash, Wallet)
- By trip type (Day/Night)

Made with GAMMA

Enhanced Dashboard Features

Dynamic Title

Chart titles update automatically based on selected measures

Interactive Slicers

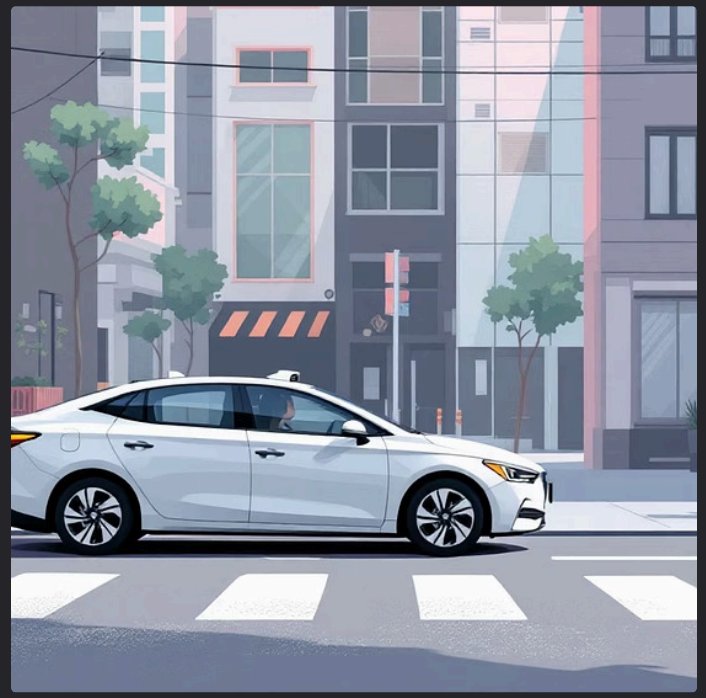
Date, city, and other filters for deeper analysis

Smart Tooltips

Additional details on hover: average values, trip distance

Made with GAMMA

Vehicle Type Analysis



Grid View

Matrix visual displaying KPIs by vehicle type

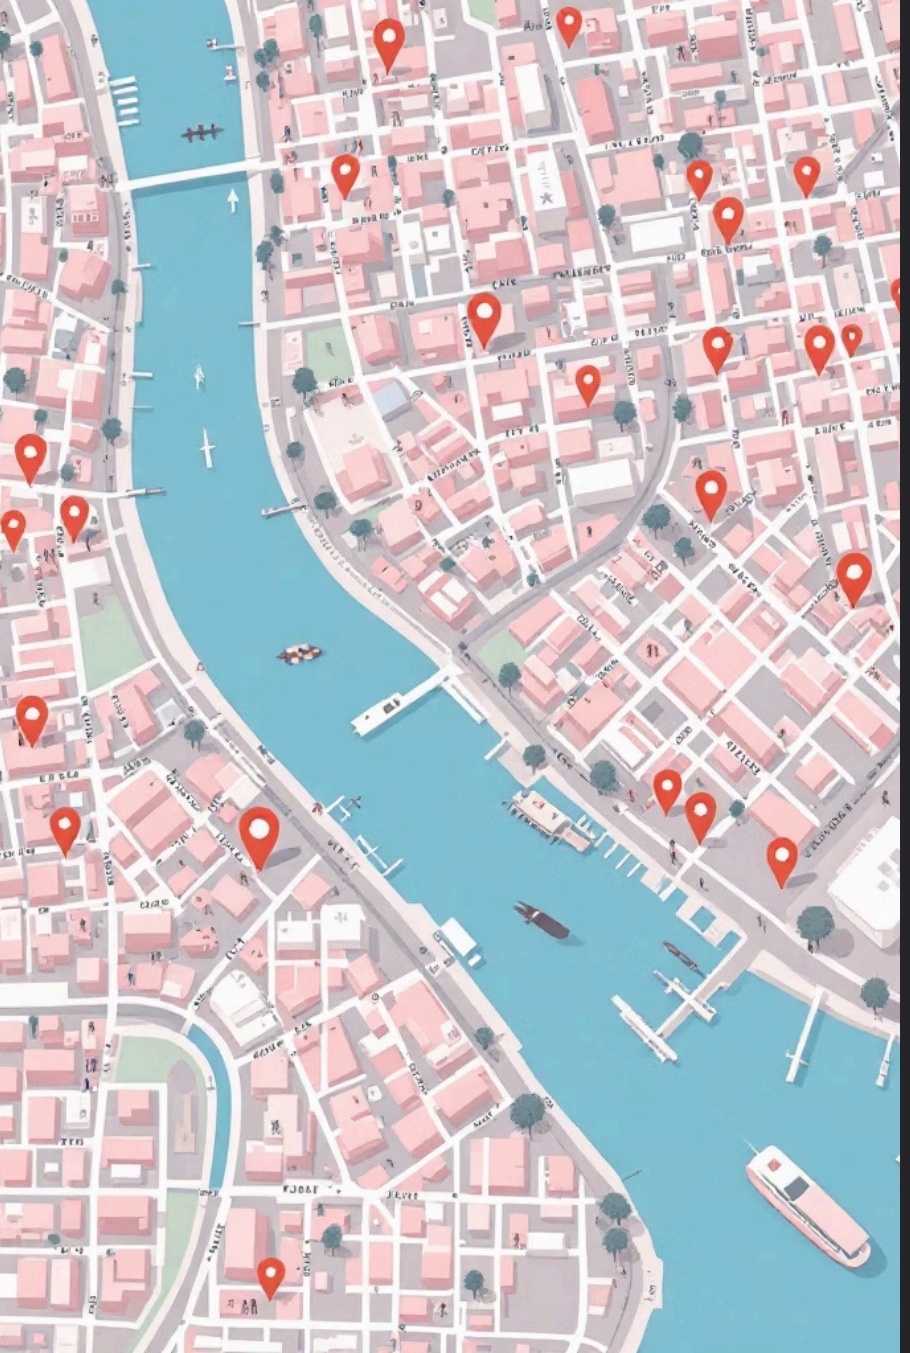
Conditional Formatting

Highlight high and low values for quick insights

Sorting & Filtering

Enable user interaction for precise analysis

Made with GAMMA



Booking Trends Analysis

By Day

Detect trends and fluctuations in daily trip volumes

By Location

Top 5 locations with highest trip bookings

Vehicle Preference

Most frequently booked vehicle type at each pickup location

Made with GAMMA

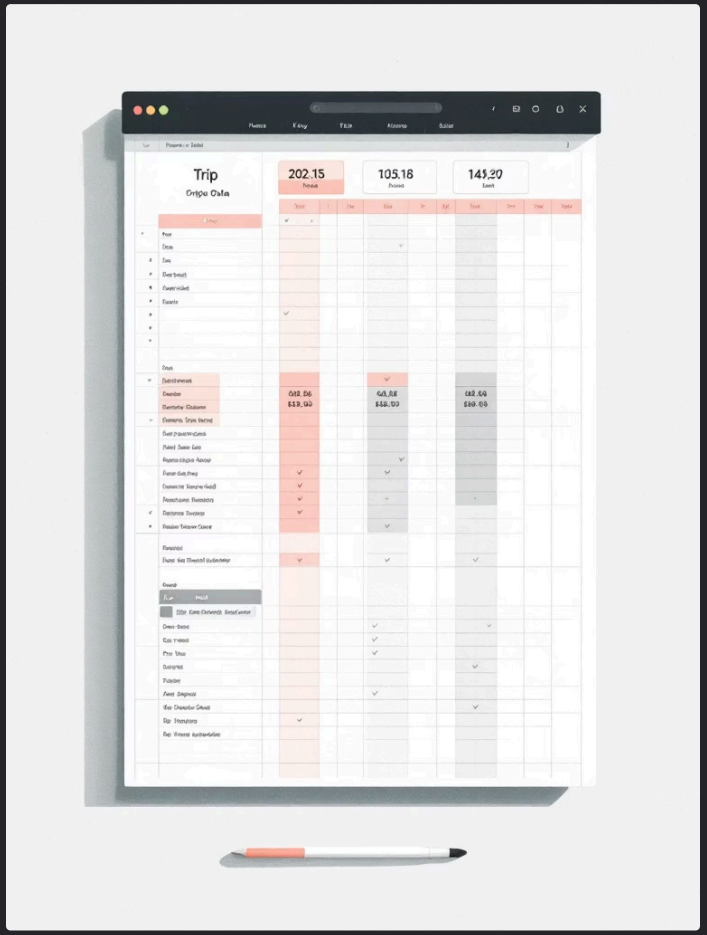
Details Tab: Granular View

Comprehensive Trip Records

- Pickup and drop locations
- Trip distance and duration
- Fare amount and payment type
- Driver details and trip status

Purpose

Drill-down analysis to investigate specific transactions, validate KPI calculations, and identify patterns or anomalies



Made with GAMMA

Grid Tab Features

Structured Table

Trip ID, times, locations, distance, fare, payment, driver, status

Drill-Through

Right-click data points to view detailed trip records

Full Data Bookmark

Toggle between filtered results and complete dataset

Data Validation

Verify KPIs and aggregated metrics from summary dashboards

Made with GAMMA

Key Takeaways

Revenue Insights

Identify peak high-revenue locations and optimize pricing strategies

Operational Efficiency

Understand driver performance and cancellation rates

Data-Driven Decisions

Support strategic planning with actionable analytics
